

# CANADRILL ENGINEERING

HELPING YOU WITH EXPERIENCE AND RESULTS

Canadrill is a full service Engineering, project management and well-site supervision firm located in Calgary Alberta. We specialize in horizontal drilling, completion and optimization sections of the oil and gas industry. Along with our drilling and completion services, Canadrill provides a unique casing design service.

## DRILLING SERVICES

Canadrill's professional team specializes in multi-frac and horizontal drilling services in both Canada and the U.S.

- Multi-frac and Horizontal Drilling Services
- Drill wells faster
- Less impact on environmentally sensitive areas
- Improve access to contaminants at sites with surface restrictions
- Efficiently extract soil vapor
- Identify the causes of decreased well performance

Well completion is the process of finishing a well so it's ready to produce oil or natural gas. Canadrill incorporates the following steps to transform a drilled well into a producing one.

- Well Casing
- Cementing
- Perforating
- Open Hole Completions
- Gravel Packing

## WELL COMPLETION

## CASING DESIGN

Canadrill's casing service will save your company time and money with our custom built pipe that improves performance and efficiency.

- Reduces drilling time and lowers cost
- Higher productivity and efficiency results
- Prevent contamination of fresh water well zones
- Seal off high pressure zones from the surface, avoiding potential for blowouts
- We use the latest industry software

---

## OTHER SERVICES

- Construction Services
- Completion/Recompletion/Workover Services
- Environmental Services
- Optimization Services
- Training & Regulatory Requirements

At Canadrill, our professional staff will help maximize your results, while reducing your program costs. We are a relationship based company with a focus on safety. We specialize in several geographical regions including the Bakken and Cardium Formation, Foothills, Montney Region, Horn Basin and Arctic (NWT) Region.
